

Alaska Highway Road Log

The engineering marvel of the Second World War, and major adventure road leading to the [Yukon](#) and [Alaska](#). To many, this trip represents a lifetime of planning and thought, while to others it is an annual journey. Whether this is your first time or you're a seasoned traveller of the highway, we hope the following information will be an asset. Stretching 2,288 km/1422 miles from [Dawson Creek, British Columbia](#) to [Delta Junction, Alaska](#). The highway is mostly paved in Canada and all paved in Alaska.

From Dawson Creek, the Alaska highway extends almost 968 km/595 miles to Lower Post where it enters the [Yukon](#). The highway winds through the Yukon for about 885 km/550 miles and crosses into Alaska at mile 1221/km 1964. Continuing on to Delta Junction at mile 1422/km 2288, the Alaska Highway joins the [Richardson Highway](#) for the remaining 98 miles/158 km to [Fairbanks AK](#).

0-[Dawson Creek](#). Elevation 2,185 ft. Junction of Alaska Highway and Highway 97.

km 1873.8/mile 1164.3 [Canada Customs and Immigration](#), open 24 hours a day year round. All traffic entering Canada must stop.

km 1881.6/mile 1169.2 Snag Creek.

km 1883.7/mile 1170.5 Mirror Creek. Fishing for Grayling.

km 1884.4/mile 1170.9 Rest area.

km 1897/mile 1178.7 Little Scottie Creek.

km 1902.5/mile 1182.2 Rest Area; information sign with facts on International Border.

The bold number in the highway description is the distance from Dawson Creek, British Columbia. If you are northbound the markers change from kilometres to miles. If you are heading south the markers are in kilometres.

km 1902.5/mile 1182.2[US Customs and Immigration](#). All traffic entering Alaska must stop. Open 24 hrs. Time Zone Change. If you are traveling to Alaska it is one hour earlier, The [Yukon](#) is on Pacific Time Zone. It is the law in [Alaska](#) to travel with your headlights on at all times.

km 1902.5/mile 1182.2 You're now entering Alaska's broad, interior plateau extending from the Wrangell and Alaska Mountain Ranges to the Brooks Range beyond the Yukon River. Highway descends gradually over the 300 miles to Fairbanks along the Tanana River.

There is a 40mile/64 Kilometre difference between the Yukon Log Numbers and the Alaska Road Log Numbers

mile 1223/km 1968 East boundary of Tetlin National Wildlife Refuge.

mile 1223.4/km 1268.8 Scotty Creek.

mile 1224.8/km 1971 Interpretive sign, parking, the Arctic Loon can often be seen in these marshes.

mile 1225.5/km 1972.2 Border City Trading Post.

mile 1228/km 1976 Parking with information sign on "Corridors for Passage".

mile 1229/km 1977.8 [Tetlin National Wildlife Visitor Center](#). This 924,000 acre refuge is located in east central Alaska, adjacent to the Yukon Territory border, directly south of the Alaska Highway and north of [Wrangell - St. Elias National Park](#). The major physical features include broad flat river basins bisected by rolling hills, extensive marsh and lake complexes, foothill areas of the Nutzotin and Mentasta mountains, and two major glacial rivers which combine to form the Tanana River.

The refuge was primarily set aside because of its unique waterfowl habitat. It has one of the highest densities of nesting waterfowl in Alaska, and in favorable years produces about 100,000 ducklings to flight stage. As a migration corridor for all types of birds entering and leaving Alaska, the refuge provides habitat for 143 nesting species of birds and 47 migrants.

Big game animals include moose, caribou, Dall's sheep, grizzly bear, black bear and wolf. Other mammals include wolverine, lynx, marten, otter, red fox, beaver, muskrat, snowshoe hare and mink.

Arctic grayling, burbot, lake trout, northern pike and whitefish are present in refuge lakes and streams. No significant salmon runs reach this far inland.

As one of the only two road-connected Alaskan refuges, Tetlin has the unique opportunity of reaching nearly all the visitors who travel to the state via the Alaska Highway. Visitors from all over the United States and many foreign countries pass along Tetlin's northern boundary every year. This gives the refuge an outstanding opportunity to provide interpretation about Alaskan habitats and the National Wildlife Refuge System. To meet this challenge, the refuge is an active participant in the Alaska Public Lands Information Center in Tok, and has a visitor reception center with interesting display at mile 1229.

mile 1233/km 1984 Parking.

mile 1240/km 1995.5 Parking, Hidden Lake Trail.

mile 1240.2/km 1995.9 The vertical culverts along the road were one of many attempts to prevent the permafrost from thawing and the road from falling apart.
