Seward Highway Road Log

**Mile by Mile Description of the Seward Highway so you
always know what lies ahead.**

Anchorage, Alaska to Seward, Alaska

Bell's Travel Guides

This 127 mile/204 km highway has been designated a National Forest Scenic Byway. It connects the cities of Anchorage and Seward traveling past salt water bays, ice-blue glaciers, and alpine valleys. The first 50 miles of the highway twists and turns along the base of the Chugach Mountains, and the shore of Turnagain Arm.

The 37-foot tides here are exceeded only by those in Nova Scotia's Bay of Fundy. The waters racing out of the inlet expose miles of mud flats and when they return, frequently create 6-foot bore tides.

Thirty-eight miles from Seward, the route joins the Sterling Highway which continues down the peninsula to Soldotna, Kenai, Ninilchik, Anchor Point, and Homer. The Alaska Railroad parallels the Seward Highway to Portage, where it has a branch line to Whittier Alaska -port for the Alaska Marine Ferry System. Alaska Marine Ferry System has service to Valdez and Cordova on the and the rest of Southeast Alaska. The railroad also serves Seward, which was the original starting point of the Alaska Railroad.

Just past the turn-off for Portage Glacier, you will enter the Kenai Peninsula Borough - over 25,000 square miles of scenic park lands, forests, volcanoes, glaciers, coastline, rivers, and unique communities. Here it is easy to try your luck at hooking a world record king salmon or a giant halibut, photograph a Russian church or see sea lions, whales, and a kaleidoscope of seabirds all on the same day!

Warning: The mudflats along the coast from Anchorage to Portage (Turnagain Arm) exhibit quicksand-like conditions. It is extremely dangerous to walk on the beach or mudflats in this area.

AWCC takes injured and orphaned animals and provides spacious enclosures and quality animal care. Animals that cannot be released into the wild are given a permanent home at the center
Come be a part of these exciting programs and watch these animals display their natural, "wild", behavior. Coyotes peer out from behind the brush while a bald eagle swoops in on the salmon remains left by a grizzly bear. Wood Bison plod through 65 acres of tidal flat terrain, as part of a program that will one day restore the species to the Alaskan wilderness.

Bell's Travel Guides

AWCC has been able to provide care for hundreds of displaced animals because visitors to AWCC have made critical contributions in the form of admission fees, donations, memberships, and gift shop purchases. AWCC encourages you to visit the center with your walking shoes and camera in hand for an educational Alaskan experience to remember. We thank you in advance for your support and assistance in preserving Alaskan wildlife. www.alaskawildlife.org

mile 78.9 Portage Creek #1

mile 78.9 Access road to Portage Glacier and Whittier, Gateway to Prince William Sound.

Portage

Portage Glacier Recreation Area. Access via a 5 mile/8 km paved highway. Three U.S. Forest Service campgrounds with more than 64 camping spaces are located approximately a mile apart on the Portage Glacier Road: Beaver Pond Campground, Black Bear Campground, and Williwaw Campground. The road ends at a large parking lot overlook at the western end of Portage Lake with excellent views of the icebergs floating in the lake.

Begich Boggs Visitor Center open from Late May to mid September, 7 days a week. 907-783-2326. Forest Service Naturalists describe the many phenomena associated with the glacier. A self-guided trail begins south of the visitor center. During July and August you can see spawning salmon in nearby Portage Creek.

Portage Glacier is one of Alaska's most accessible and frequently photographed glaciers. Icebergs, weighing many tons, are blown about on Portage Lake (600 ft. deep), creating an ever-changing panorama of weather-sculptured blue ice.

The M.V. Ptarmigan offers a one hour tour on Portage Lake to the face of Portage Glacier. This tour will give you an up close look at one of the most visited glaciers in Alaska. Daily departures mid-May to mid-September.
