

Alaska Highway Road Log

Mile by Mile Description of the Alaska Highway
from Dawson Creek, BC to Delta Junction, Alaska

Alaska Highway Introduction

The Alaska Highway was the engineering marvel of World War II and was once described as the largest and most difficult construction project since the Panama Canal. Whether this is your first time driving to Alaska or you're a seasoned traveler of the Alaska highway, we hope the following information will be an helpful. Stretching 2,224 Km/1382 miles (Originally 1422 miles) from Dawson Creek, British Columbia to Delta Junction Alaska. The Alcan Highway is mostly paved in Canada and all paved in Alaska.

The highway surface is paved or chip sealed (which is more common), however, there are still rough patches and construction to watch for. Most problem areas are marked by signs, but not all, so stay alert. You may encounter long sections of new chip seal which can be very dusty so drive with your headlights on at all times. Finally, pay close attention to all highway signs as they will alert you to changing road conditions.

The original highway was marked with mileposts in 1947 and many of the towns and highway lodges along the way became known by their milepost number. Even today, many lodges use Historical Mileposts (HM) to refer to their location. The Canadian portion of The Highway is now marked with kilometre posts and due to highway reconstruction and re-routing over the years, the road is now 64 km (40 miles) shorter than the original Alaska Highway. Alaska, however, has not changed the original mileposts, so there is a mileage discrepancy of 40 miles when you cross the border.

From Dawson Creek, the Alaska Highway extends almost 970 km/595 miles to Lower Post where it enters the Yukon. The highway winds through the Yukon for about 892 km/550 miles and crosses into Alaska at mile 1182/km 1903. Continuing on to Delta Junction at mile 1422/km 2224, the Alaska Highway joins the Richardson Highway for the remaining 98 miles/158 km to Fairbanks AK.

History

The building of the Alaska Highway took unprecedented cooperation between the Canadian and United States governments to make construction possible. After the attack on Pearl Harbor both Nations agreed on the importance of a highway connecting Canada and Alaska and quickly put the wheels in motion.

The United States Army approved a plan for the construction of the Alaska Highway on February 6, 1942 and received authorization from the U.S. Congress and President Roosevelt only five days later. Canada agreed to the construction if the United States would bear the full cost and that the road and all facilities in Canada were to be turned over to Canadian authority at the end of the war. Less than a month later, on March 8, 1942 construction began.

More than 11,000 soldiers and engineers, 16,000 civilians and 7000 pieces of equipment were called upon to build this 1500 mile road through the vast wilderness of northern Canada and Alaska. In less than nine months these hardy men managed to connect Dawson Creek, British Columbia and Delta Junction, Alaska. And, on November 20, 1942, the official ribbon cutting took place at mile 1061, known as "Soldiers Summit."

The successful completion of the Highway in such a short time was accomplished by having teams start in both Dawson Creek and Fort Nelson and work their way north. Meanwhile, two other teams started in Whitehorse and worked in opposite directions; one southeast towards Dawson Creek and one northwest towards Alaska. The fifth and final team pushed the road through from Delta Junction to the Canadian Border. The final tally for the Alaska Highway was approximately \$140 million U.S. dollars, making it the most expensive construction project of World War II.

Dawson Creek To Watson Lake

Kilometre 0 (Historical Mile 0)-**Dawson Creek.**
Elevation 2,185 ft. Junction of Alaska Highway and Highway 97 (Hart Highway).

km 2.4 Mile 0 RV Park & Walter Wright Pioneer Village. Take a self-guided tour of the Pioneer Village heritage site to explore the lives of early pioneers or take a break and relax at the man-made Rotary Lake and Splash Park.

km 3.2 Dawson Creek Public Golf Course.

km 5.3 Parking.

Alaska Border to Delta Junction

Due to Alaska Highway reconstruction, there is a 40mile/64 Kilometre difference between the Yukon Log Numbers and the Alaska Road Log Numbers when you cross the border.

The Yukon and British Columbia have placed new kilometre posts while Alaska still uses the original milepost markers. The Alaska Highway road log below uses the actual Alaska mileposts.

You're now entering Alaska's broad, interior plateau extending from the Wrangell and Alaska Mountain Ranges to the Brooks Range beyond the Yukon River. Highway descends gradually over the 300 miles to Fairbanks along the Tanana River.

mile 1223 East boundary of **Tetlin National Wildlife Refuge**.

mile 1223.4 Scottie Creek.

mile 1224.8 Interpretive sign, parking, the Arctic Loon can often be seen in these marshes.

mile 1225.5 Border City Trading Post.

mile 1228 Parking with information sign on "Corridors for Passage"

mile 1229 Tetlin National Wildlife Refuge is a dynamic landscape made up of forests, wetlands, tundra, lakes, mountains and glacial rivers bounded by the snowy peaks of the Alaska Range. This upper Tanana River valley has been called the "Tetlin Passage," because it serves as a major migratory route for birds traveling to and from Canada, the lower 48 and both Central and South America. Many of these birds breed and nest on the refuge. Others pass

through on their way to breeding and nesting grounds elsewhere in the state. Migrants, including ducks, geese, swans, cranes, raptors and songbirds, begin arriving in the valley in April, and continue into early June. An estimated 126 species breed on Tetlin during the short summer.

Tetlin Refuge also supports a variety of large mammals. Dall sheep dot the higher slopes while moose feed upon the tender new growth that springs up in the wake of frequent lightning caused fires. Wolves, grizzly and black bears and members of three different caribou herds range over the refuge.

mile 1233.2 Parking.

mile 1240 Parking, Hidden Lake Trail.

mile 1240.2 The vertical culverts along the road were one of many attempts to prevent the permafrost from thawing and the road from falling apart.

mile 275 (RH) Tanana Trading Post and Tesoro Gas station to South side of highway. Big Delta State Historical Park and turn off to Rika's Roadhouse on North side of highway.

Rika's Roadhouse at Big Delta State Historical Park. The Valdez-to-Fairbanks trail brought travelers to the banks of the Tanana River, where they crossed by ferry. John Hajdukovich, a Yugoslavian entrepreneur, bought the land along with a fur trading post in 1909 making the Roadhouse over 100 years old. The two-story roadhouse, built of logs became a year-round oasis for hunters, trappers, prospectors and travel-

ers as well as local Athabascans and homesteaders. However, John had many other interests, including the responsibility of US Game Commissioner. Sitting still and running a roadhouse did not appeal to him so he simply asked guests to make themselves at home and leave some money on the table. He ran it in this way until 1918, when finally a dependable, hard-working Swede named Rika Wallen was hired to take over. Learn more of this fascinating story by visiting the Roadhouse, refresh yourself at the Restaurant and enjoy the gift shop. Open from mid May to mid September 10am - 5pm offering homemade soups, hot and cold sandwiches, salads, fruits, pie and ice cream. The gift shop specializes in local, Alaskan made items, including jewelry, knives, ulus, pens, hats and mittens, photography, historical local books and post cards, furs, food and snacks, and souvenirs and much more. Free admission to the park! 907-895-4201
